Begründungen

0

The speaker says: "Andrew Johnson is one of only four people in the United States who can officially call themselves a Lego Master Model Builder. He's the newest and the youngest to earn that title." The total number of Lego experts in the States is therefore four.

1

The speaker says: "Legos are robots in disguise for Andrew Johnson, as in a four-and-a-half-foot replica of the Transformer Optimus Prime made only from those tiny bricks." Andrew therefore regards Lego bricks as robots in disguise.

2

The speaker says: "Number of bricks was definitely in the tens of thousands." Therefore, the total number of pieces Andrew needed for his Lego model was tens of thousands.

3

The speaker says: "The head itself, which was the most detailed, took me around eight to ten hours." For the top part of his model alone, Andrew therefore needed 8 to 10 hours.

4

The speaker says: "Well, I have a social life. I don't think that that's lacking in anyway. I have a girlfriend, so I'm not just some loner that plays with Lego." Therefore, despite his fascination with Lego, Andrew does not miss out on a social life or on a girlfriend.

5

The speaker says: "Johnson impressed the judges during the Chicago-themed round with his recreation of the iconic Picasso sculpture that stands 50 feet tall in the city's Daley Plaza." In one contest, the jury therefore particularly liked Andrew's Lego copy of an iconic Picasso sculpture.

6

The speaker says: "Johnson didn't receive any formal training to get to this level. He played with his Legos like any other kid and only reconnected with the bricks just a few years ago when he worked as a summer camp counselor." What brought Andrew back to Lego was therefore a holiday job at a summer camp.

7

The speaker says: "This spring, Johnson will graduate from DePaul University in Chicago with a degree in history and a minor in digital cinema." Andrew is therefore studying history and digital cinema.

8

The speaker says: "Johnson hopes to build on his background in digital cinema to introduce new programs, including stop-motion animation." Andrew's qualifications might therefore help him with innovations like stop-motion animation.

9

The speaker says: "That's an exciting prospect for his bosses, given the explosion in and popularity of stop-motion animation videos online. The YouTube videos feature Lego recreations of everything from OK Go music videos to scenes from 'Star Wars'." Therefore one website even shows Lego copies of OK Go music videos and scenes from Star Wars.
